STARTING AND MANAGING A FARM

By C. M. Hampson, University of Florida.

16*s*.

Deals primarily with the problems of those who wish to start farming. Among the topics included are: pros and cons of farming, opportunities of small farms, financing and managing a part-time farm, what it takes to farm successfully, how to get started in farming, selecting a farm, managing a full-time farm, and planning a life programme.

AGRICULTURAL ECONOMICS

By Benjamin H. Hibbard, Professor Emeritus of Agricultural Economics, University of Wisconsin.

433 pages 9 × 6. Illus. 30*s*.

Presents the main economic facts pertaining to the operations and relationships involved in farming under modern economic, political, and social conditions. Land valuation, wages, rent, farm credit, marketing, tenancy, tariff legislation, the "New Deal," and farmers' attitudes and organizations are thoroughly treated.

ENGINEERING WITH RUBBER

By Walter E. Burton, in collaboration with engineers and research men of the B. F. Goodrich Co.

486 pages 9 × 6 39s. in U.K.

A convenient source of technical information concerning practical uses and applications of rubber in industry. Discusses American-made rubber, crude rubber, and rubber-like materials ,including vinyl chloride polymers.

FLOODS—THEIR HYDROLOGY AND CONTROL

By H. K. Barrows

432 pages 9 × 6 39s. in U.K.

Treats comprehensively the subject of flood control and its hydrology for the country as a whole. It is an up-to-date and extremely practical work which will be of primary interest to practising engineers, but professors of civil engineering will find it valuable as a supplement to texts on water power. Typical problems relating to flood control are appended.

Methods of Quantitative Micro-Analysis

Collected and edited by **R. F. MILTON**, B.Sc., F.R.I.C., and **W. A. WATERS**, M.A., Sc.D., Ph.D., F.R.I.C. viii + 599 pages, 169 illustrations. *Published February 17.* **60s.** net.

During the war the contributors to this book were all members of one of the scientific research organizations of the Ministry of Supply. They have felt that the great advantages to the national effort that were then gained by large-scale co-operative team-work could, at the present time, be made of still wider and more lasting value if careful accounts of the more important aspects of their various specialised techniques were collected together in a single book of manageable size. The result is "Methods of Quantitative Micro-Analysis", which covers all branches of chemistry, is fully documented and has the experimental details carefully set out.

Five-Figure Tables of Mathematical Functions

Comprising Tables of Logarithms, Powers of Numbers, Trigonometric, Elliptic, and other Transcendental Functions. By **J. B. DALE**, M.A. *New (Second) Edition.* viii + 121 pages. *Published February 17.* **6s.** net.

The tables have been reset and particular attention paid to the typographical lay-out to ensure greater ease in using the tables. Certain additional tables have been included in this edition.

Logarithmic and Trigonometric Tables

Physics Revision Course

For Higher School and Intermediate Examinations. By **V. H. L. SEARLE**, M.Sc., Lecturer in Physics at the University College of the South West of England, Exeter. viii + 120 pages, 75 diagrams. **6s. 6d.**

Gives the principal definitions and equations in all branches of physics, with the derivation and applications of the latter, and enables the student to run rapidly through his subject when revising for an examination.

Electricity and Magnetism

By **M. NELKON**, M.Sc., A.K.C. viii + 430 pages. **10s. 6d.**

This new text-book includes, besides the usual topics, an account of the main principles of A.C. circuit theory and the physical principles of valves and some of their uses.

Christian Huygens

And the Development of Science in the Seventeenth Century. By **A. E. BELL**, Ph.D., M.Sc. 220 pages, 61 illustrations in the text and 7 photogravure plates. **18s.** net.

An account of the life and work of this important Dutch scientist, written against the background of scientific thought in the seventeenth century.

CAMBRIDGE FLUXMETER

IMPROVED PATTERN

In this instrument the readings are practically independent of the rate of cutting the magnetic lines of force, the drift of the pointer has been entirely eliminated, and readings may be taken with great facility and rapidity. The scale is approximately 150 mm. long, divided 60-0-60, each division representing 10,000 Maxwell turns.
